For many years KNEETEK® has specialized in developing high quality protection systems for knees, that make working in a kneeling position even more comfortable, safer and effective. Ideas and wishes for an ideal kneepad have been directly integrated into product development by incorporating craftsmen and people from relevant industries and trades. Innovate engineering, experimental use of the most modern materials and extensive tests in practical operations have led to the best possible outcome. The result: kneepads that have been well thought through, perform well and in practice, conform to the highest requirements of functionality, comfort and safety. Benefit from our years of experience and comprehensive expertise through a huge range of consulting and services. KNEETEK® – the intelligent way of protecting your knees. Kneepads with best damping properties, high resistance and reliability, even under extreme conditions. An absolute must for all health-conscious professionals and discerning DIY enthusiasts.

BASICLINEPROFILINESAFETEK Kneecushions Knee pad for work pants with best cushioning and recovery properties, developed according to the strict guidelines of DIN EN 14404.

MultiPadMaxi 16 Maxi 16N Kneecushion The easy alternative to take away. The perfect companion for on the go, with excellent

damping properties.RedPadBack Support Belts Effective relief of the entire back area. An absolute must for all professions in which back-loading work is carried out.Back Support Belt BR 108
