Etap Packaging manufactures Dunnage Bags and Load Stabilizers. Today, Etap Packaging produces one of the most technically advanced Dunnage Bags and Load Stabilizers in the world. Quality centered mission and ongoing innovation have enabled Etap Packaging to offer creative solutions to business partners' challenges while providing highest value. Today, Etap Packaging exports more than 50% of its production to Europe, USA, Middle East. Dunnage Bags Producer Kraft Paper and PP Dunnage Bags Sizes & Quantities Filling Adapters and Valve Types Dunnage bags, with a wide variety of sizes and strengths to meet your shipping requirements. The trapped air inside these lightweight, yet strong and durable air bags provides the needed cushion to protect your load from shock and vibration. 2-ply high strength (PP or kraft paper) inflatable dunnage bags are easier and more economical to install than more costly alternatives such as wood bracing because with air bags there's no carpentry, construction or teardown time to worry about. Also, no special storage or repairs are needed when using an Etap dunnage bag. Container Airbags are very simple to use and to apply. We can provide different filling adapters for a

variety of purposes. Etap Dunnage bags are for professional use and for professional Transport security. The can be used in sea Containers, trucks and train waggons.
